

## PLAN AHEAD, PLANT AHEAD for the HONEYBEES

White Dutch Clover, Hubam (yellow & white sweet) Clover need to be planted (sowed) over lightly disked ground in late August or early September for the following spring in an area protected from mammals (beef, deer, goats, etc). Erect fence or border with Vitex (chaste tree) seeds or plants which will bloom the first season from May to July.

From December through March the Fragrant Honeysuckle Bush blooms to supplement winter feeding. No other plants are in bloom at this time.

March & April welcome White Dutch Clover blooms as well as Blueberry, Dewberry, Gallberry & other spring flowers & fruit trees.

May blooms come from Vitex, Hubam Clover, Chinese Tallow (popcorn) Tree & garden crops.
